bacterial exceedances, AB 411 season	43			bacterial exceedances, AB 411 season	11.0	
bacterial exceedances, November - March	14			bacterial exceedances, November - March	5.98	
Other	16			Other	25.74	
<u>General Advisories</u>		11				
<u>chronic events</u>		4				
Totals		114			107.05	

Note:

Chronic events are not tallied with other events because normal protocols to remove signs are not followed at these locations. Although sample results at chronic locations may occasionally be within state standards, the presence of known, on-going sources of contamination require these beaches to remain posted under advisory or closure to protect public health.

For further analysis of yearly beach closure and advisory data, see the *San Diego County 2007 Beach Closure & Advisory Report Summary*. This report uses the Beach Mile Day unit to compare closures on a year to year basis, and advisories due bacterial exceedances during AB 411 period (April - October).
